Norwegian Gold Kids DHA provides the brain and eye health benefits of essential Omega-3 DHA fish oil without any “fishy” taste. It is enhanced with the antioxidant astaxanthin and 500 IU Vitamin D3 to help build strong bones and support immune health.*

What is DHA?

DHA is an Omega-3 fatty acid that comes from fish oil. DHA is concentrated in the brain and is considered to be essential in the proper growth and development of the brain, nervous system and retina to support optimal cognitive function.

Why Give Kids DHA?

Between birth and five years of age, the human brain increases approximately 3.5 times in mass. It is important that children consume adequate amounts of DHA to support this period of rapid brain and eye growth and development.

Did you know?

- DHA supports normal cognitive function*
- DHA supports brain and eye development and function*
- ADHD has been associated with low levels of DHA*

Ultimate Flora Kids DHA was formulated by Brenda Watson, C.N.C. She is the president of ReNew Life Formulas and the founder of natural healthcare clinics specializing in digestive care.
